Monthly Exploration

**Conifers and Evergreens: Adaptations and Use**

What is the difference between conifers and evergreens? What special adaptations help these trees cope during the winter? How did they help Native populations survive? A walking tour of the Conifer Collection will help us understand the importance and use of these magnificent trees. After the walk, participants will engage in hands-on activities to examine specific evergreen adaptations, and discuss their classroom applications.

- Try out hands-on experiments
- Browse teacher resources
- Share your knowledge
- Enjoy refreshments

**Saturday, February 6th**
