Descriptive Summary

Repository: Arnold Arboretum, Jamaica Plain, MA 02130

Call No.: II A-15

Location: Archives

Title: John S. Burley (1950-) papers, 1986-1998.

Date(s): 1986-1988

Creator: Burley, John S., 1950-

Quantity: 3.5 linear ft. (3 boxes)

Language of material: English, Indonesian

Abstract: This collection focuses on the work John S. Burley completed as Research Director of the Southeast Asia Program at the Arnold Arboretum. It contains correspondence, administrative documents, and reports dating between 1986 and 1998.

Note: Access to Finding Aid record in [Hollis Classic](#) or [Hollis](#).

Preferred Citation: John S. Burley papers. Archives of the Arnold Arboretum of Harvard University.

Additional material: Additional John Burley correspondence may be found by searching the [Arnold Arboretum Correspondence Index](#).

Processing Information

Kayleigh Hinckley, January 2011. Revised by Sheila Connor and Liz Francis, October, 2011.

Acquisition Information

The papers of John S. Burley were acquired by the Arnold Arboretum Archives from the office of Robert Cook, Director of the Arnold Arboretum 1989-2009, in 2006. They had formerly been housed at the Harvard University Herbaria, 22 Divinity Avenue, Cambridge Massachusetts.

Terms of Access

Researchers seeking to examine archival materials are strongly encouraged to make an appointment. The Director, or an office of origin, may place restrictions on the use of some or all of its records. The extent and length of the restriction will be determined by the Director, office of origin, and the Archivist.

Terms of Use

The copyright is held by The President and Fellows of Harvard College for the Arnold Arboretum Archives of Harvard University. The copyright on some materials in the collection may be held by the original author or the author's heirs or assigns.

Researchers are responsible for obtaining written permission from the holder(s) of copyright and the Arnold Arboretum Archives prior to publishing any quotations or images from materials in this collection.

Photocopies may be made at the discretion of the Arnold Arboretum Archives staff. Permission to make photocopies does not constitute permission to reproduce or publish materials outside the bounds of the fair use guidelines.

Biographical Note

Born in 1950, John S. Burley grew up in Brighton, England and attended the University of Aberdeen in Scotland where he earned a Bachelor of Science in 1982 and a Ph.D. in systematic botany in 1986. Burley was the recipient of several prizes in Botany, including the Dickie Prize, the Collie Prize, and the Turner Scholarship in Biology.

In 1987, Burley was awarded a Mercer Fellowship at the Arnold Arboretum. As a Mercer Fellow, Burley was simultaneously a research associate in the Program for Collaborative Research in Pharmaceutical Science (a partnership with the University of Chicago) and a taxonomist for the National Cancer Institute's program to screen Southeast Asian rainforest plants for anti-cancer and anti-AIDS properties. Burley coordinated many of the National Cancer Institute (NCI) collection expeditions to the Philippines and Indonesia. In 1987, as part of a NCI mission, Burley collected a sample of *Calophyllum lanigerum* var. *austrororiaceum*, in a swamp forest in Sarawak, Borneo. In a test designed to identify properties that inhibit the AIDS virus, National Cancer Institute researchers, discovered that under laboratory conditions an extract of this plant, "essentially halted HIV-1 replication." Though difficult to harvest, AIDS researchers continue to work with the extract, looking for a cure.

This experience in Southeast Asia became the groundwork for Burley's principal undertaking at the Arnold Arboretum. Beginning in 1991, Burley became Research Director of the

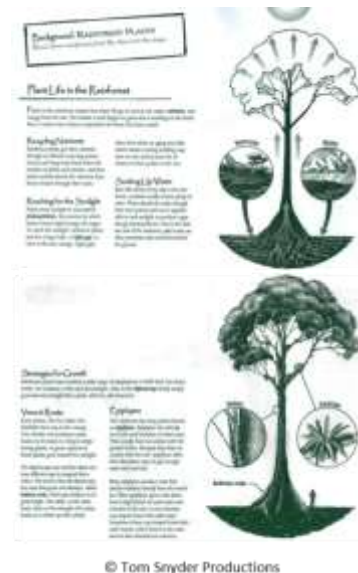

Museum Zoologicum Bogoriense
Photograph by Marieke Schouten

Southeast Asia Program at the Arnold Arboretum and spearheaded the Arboretum's partnership with the Indonesian government and the Global Environment Facility (GEF) of the World Bank to rehabilitate the facilities of the Herbarium Bogoriense in Bogor, Indonesia. The technical assistance provided by the Arnold Arboretum and the Royal Ontario Museum assembled and coordinated activities pertaining to the biodiversity collections and development of the herbarium and focused on four main aspects:

1. The management system of the herbarium collections
2. The physical condition of the collections
3. Information systems of the herbarium collections
4. Human resources development

At the end of the project these activities were transferred to the existing management of the herbarium, under the Botany Division. To maintain the sustainability of the improvements to the collections, the new curatorial system was continued, and all staff and technicians of the Taxonomy group were involved.

In 1994, and as an unanticipated result of the Arboretum's search for plants containing anti-cancer and anti-AIDS compounds in the Indonesian tropical forests of the Southeast Asia, the Arboretum began collaboration with Tom Snyder Productions, a Scholastic company, and a developer and publisher of educational software for K-12 classrooms. Supported by a grant from the National Science Foundation, John Burley, his research associate Andrew MacDonald, and Bob Cook, Director of the Arboretum worked with the Snyder production team to develop narrative and ensure scientific accuracy for Rain Forest Researchers, an interactive CD-ROM-based curriculum based on actual scientific research on the discovery and management of biological resources for middle-grade students published in 1996. Please see Arboretum publications, ARCHIVES V A-4.

Also in 1994, the Arnold Arboretum was awarded a grant from the Government of Indonesia for a five-year contract to provide technical assistance as part of a project to increase the capability of Indonesian scientists and government agencies to conserve the country's biodiversity and manage its natural resources. Burley was the Principal Investigator for the

Indonesian Biodiversity Collections Project and he assembled an international team of experts drawn from Harvard University, London's Natural History Museum, the National Museum of Natural History, the Rijksherbarium of the Netherlands, and the Commonwealth Scientific and Industrial Research Organization (CSIRO) of Australia. The Arboretum was the lead institution in this collaborative effort, which was funded by the World Bank through the Global Environment Facility.

The Project's goal was to create an international model for biodiversity conservation through technical assistance to a developing country. This assistance was to provide support for the restoration and development of zoological and botanical collections, the creation of biodiversity databases, and the training of Indonesian scientists in botany, zoology, and in information and resource conservation. Unfortunately, due to escalating civil unrest in Indonesia and in concern for the safety of their researchers, the project was halted in September 1998, two years before the end of the contract with the Indonesian government and the World Bank. It was at this time that Burley ended his association with the Arnold Arboretum.

Scope and Content

This collection contains correspondence, administrative information, and reports related to projects undertaken by John S. Burley during his tenure as director of the Arnold Arboretum's Southeast Asia Programs. Dated between 1986 and 1998, the majority of the collection deals with the Global Environment Facility (GEF) Indonesian Biodiversity project based in Bogor, Indonesia. Also documented are plant collection missions throughout Southeast Asia for the National Cancer Institute (NCI) and the National Science Foundation (NSF).

Arrangement

The Papers of John S. Burley are arranged in 5 series:

- Series I:** Global Environment Facility (GEF) Correspondence
- Series II:** Global Environment Facility (GEF) Biodiversity Project Administrative Documents
- Series III:** Global Environment Facility (GEF) Bound Reports
- Series IV:** National Science Foundation Research (NSF)
- Series V:** National Cancer Institute Research (NCIR)

Note

Plant illustrations used in this guide were selected from the 61 unlabeled illustrations in **Key Illustrations** Box **3**, Series **IV** Folder **13**.
