Descriptive Summary
Repository: Arnold Arboretum, Jamaica Plain, MA 02130.
Call No.: I D-3c BSG
Location: Archives
Title: Bussey Street Gates project, 1997-2003
Date(s): 1997-2003
Creator: Brogna, Laura Tenny
Quantity: 2.66 linear feet; 9 boxes
Language of material: English
Abstract: This collection was created after the completion of the Bussey Street Gates project, a major gate restoration project undertaken by the Arboretum in 2002, affecting primarily the Bussey and Walter Street Gates. The collection is largely correspondence (letters, memoranda, and e-mails), submittals, plans, and contracts, and slides. The collection spans 1997-2003.
Note: Access to Finding Aid record in Hollis.
Preferred Citation: Bussey Street Gates Project records. Archives of the Arnold Arboretum of Harvard University.
Additional material: More images of the gates may be found in HOLLIS Images. Use search terms "Bussey [Street] Gates" or "Walter [Street] Gates."

Processing Information
Processed July 2011, Sara Beneman, revised Sheila Connor 2012

Acquisition Information
Provenance: This collection was transferred to the Arboretum’s Archives after the completion of the Bussey Street Gates project.

Terms of Access
Researchers seeking to examine archival materials are strongly encouraged to make an appointment. The Director, or an office of origin, may place restrictions on the use of some or all of its records. The extent and length of the restriction will be determined by the Director, office of origin, and the Archivist.

Terms of Use
The copyright is held by The President and Fellows of Harvard College for the Arnold Arboretum Archives of Harvard University. The copyright on some materials in the collection may be held by the original author or the author's heirs or assigns.
Researchers are responsible for obtaining written permission from the holder(s) of copyright and the Arnold Arboretum Archives prior to publishing any quotations or images from materials in this collection.

Photocopies may be made at the discretion of the Arnold Arboretum Archives staff. Permission to make photocopies does not constitute permission to reproduce or publish materials outside the bounds of the fair use guidelines.

**Historical Note**

The Arboretum undertook a major gate restoration project in 2002, affecting primarily the Bussey and Walter Street Gates. Workers restored the stone walls and ironwork at the Walter Street gate, removed asphalt pavement within the Arboretum and replaced it with a stone dust pedestrian surfacing from Hemlock Hill Road to the Walter Street gate, repaired and rebuilt the perimeter stone wall along the north side of Bussey Street from the Walter Street Gate to the Bussey Street Gate, and created a safer pedestrian crossing by installing a crosswalk and signs. They installed two new vehicular gates (stone piers and ironwork) on Bussey and Peters Hill sides and created pedestrian access at Bussey Street which was sympathetic in character to historic gates and walls. This upgraded access to both sides for both pedestrians and maintenance vehicles. They also realigned the gate opening on the north, or Hemlock Hill, side of Bussey Street to protect a mature oak tree and performed tree pruning and other collections maintenance to benefit the mature plantings in the area.

Laura Tenny Brogna, also Laura Tenny, manager of the restoration project, was a Putnam Fellow at the Arboretum before becoming the Landscape Project Manager from 1998-2004. A graduate of Harvard University’s Graduate School of Design, she later worked as Capitol Projects Manager for Harvard Real Estate Services for Harvard University.

Julie Coop, Manager of Horticulture from 1997-2007, explained that almost all of the gates at the Arboretum have been repaired over time, and that repairs frequently used pieces from other gates. This has resulted in some gates being more detailed.
than others, and many gates being a mix of old and new parts. The Walter Street gates are entirely new reproductions. The gate pieces that were stored beside the maintenance garage or at the Case Estates are now at the storage facility at 26 Arboretum Road, Roslindale. They may have originally come from Walter Street.

**Scope and Content**

This collection contains a variety of materials, largely correspondence (letters, memoranda, and e-mails), submittals, plans, and contracts. Prior to processing, items in series I-V were stored in folders within hanging files. The contents of folders have largely remained together, except in cases where the folders contained one or very few items. Items are arranged in chronological order within folders, with the oldest items being first. The contents of Series V, box 3, folder 5 were originally in a binder.

Series VI: Binders are stored individually in custom boxes. Correspondence was all generated by Laura Tenny Brogna, the Boston Parks and Recreation Department, and the Arnold Arboretum. The project manual was created by Carol R. Johnson and Associates. The invoices and other financial information were created by Laura Tenny Brogna, Carol R. Johnson and Associates, Bryant Associates, and various consultants. Everything in this series remains in its original order. Items are arranged chronologically within binders with the oldest items being towards the back of the binder.

**Arrangement**

- **Series I:** Correspondence and notes, 1997-2000
- **Series II:** Bids and contracts, 1997-2002
- **Series III:** Progress, 1999-2002
- **Series IV:** Legal, 2001-2002
- **Series V:** Plans, drafts, and submittals, 1999-2002
- **Series VI:** Binders containing correspondence, project manual, construction progress slides 2001-2003

Box 8  Project manual: Bussey Street Gates
• Park Commission correspondence, 2002
Box 9  Financial information, 2001-2002
Box 10 Construction Progress Slides
• Consists of 10 sheets of slides containing 145 slides accompanied by 6 pages of description (scans of descriptions follows)
13. clearing for new gate, north side of Bussey Street
14. site prep and stump removal, north side of Bussey Street
15. clearing for new gate, north side of Bussey Street
16. clearing for new gate, north side of Bussey Street
17. view towards Peters Hill, existing (pre-construction) conditions
18. Clearing north side of Bussey Street for new gateway
19. existing (pre-construction) conditions at north gate, note oak behind chain link fence, to remain
20. old north gate visible to left of oak, new north gate area cleared to right of oak
21. Walter Street gate existing conditions, pre-construction. Note asphalt road through gate.
22. Walter Street pedestrian gate before removal, refinishing, and reinstallation. Gate is not operable
   prior to refinishing & will remain fixed in closed position following re-installation.
23. View from Walter Street gate towards Hemlock hill.
24. Walter Street gateway area pre-construction—view of back of Puddingstone wall.
30. compacting grade in trench adjacent to Bussey Street sidewalk, in prep for pouring concrete wall
    foundation
31. cleared area of new Bussey Street gate, north side
32. stockpiled stone from demolished Bussey Street wall (mix of granite & puddingstone). Awaiting
   installation of concrete footing before rebuilding wall along Bussey Street.
1. Granite stockpiled at north gate for Bussey St walls. Concrete cores for gate piers in place.
2. Granite stockpile; view toward Walter St gate before asphalt road removal
3. New granite wall (built by M.F. Masonry) at Bussey Street north gate
4. View toward Walter Street gate before asphalt removal; puddingstone & granite stockpile @ right
5. Walter Street gate: existing conditions with asphalt road through gate, plus stockpiled materials
6. Walter Street gate; view from Walter Street. Pre-construction at Walter Street end of project.
7. Walter/Bussey Street intersection; M.F. Masonry red carpool van.
8. View of Walter St. gate from Walter Street, prior to construction @ Walter St gate.
9. M.F. masons of Portsmouth, RI rebuilding Bussey Street stone wall
10. Rebuilding Bussey Street stone wall (combination of granite and puddingstone)
11. Bussey Street wall; Lee Kennedy site supervisor Paul McDonald in dark gray sweatshirt @ right.
   (Lee Kennedy Co. of Boston, MA is general contractor on the job.)
12. Concrete core for granite gate pier, north side. View towards Peters Hill gateway; old metal auto gates still in use.
13. Chipping down top of concrete gate pier foundation; was poured too high. Concrete footing for wall
14. Concrete core of gate pier, concrete foundation for stone wall to close off old north entrance. Note existing cobble curb at mouth of old north gateway.
15. Concrete cores for granite gate piers at north entry, looking into Arboretum.
16. View from Peters Hill, fence posts with vines remain where chain link has been removed.
17. Looking across Bussey Street: new north gateway on left of oak, old gateway on right.
18. View of rebuilt Bussey Street stone wall from Peters Hill.
19. View of north gateway across Bussey Street; construction dust
20. Temporary pedestrian ramp: Bussey St to Hemlock Hill Rd, built at Boston Traffic Dept's request.
21. Concrete footing of Bussey St wall to close off old north entrance. Old asphalt road to be removed.
22. Demolition of old north gateway; green metal auto gate and concrete footing stockpiled for disposal.
23. Remnants of sidewalk and chain link fence leading to old north gate; oak tree on left to remain.
24. Concrete footing in preparation for new stone wall at Bussey St north gate
25. excavated granite post from old north gate; to be reset at new north gate. One monumental piece of stone! (Note: for easier installation, stone footing was cut down in length and shortened post set in concrete footing at new north gate.)
Bussey Street Gates – Construction Progress Slides  #3  June 2002

1. north gate in progress, prior to excavation of roadbed to subgrade for installation of base material
2. New stone wall at north gate, by M.F. Masonry of Portsmouth, RI
3. Masons building stone wall to close off old north entrance; loader is in mouth of old north driveway
4. Masons building stone wall on Bussey Street; note poured concrete footing installed under length of new & rebuilt Bussey St. wall
5. Walter Street gate stockpile area; note sand for mortar and red mortar mixing machine
6. Sand stockpile at intersection of Walter/Bussey Streets
7. Remnant of old puddingstone wall at Walter St, to be rebuilt
8. End of rebuilt Bussey St. wall @ intersection of Walter St. Concrete footing ends here @ transition back to puddingstone walls. Note condition of asphalt sidewalk before repaving.
9. Rebuilt Bussey Street wall, north side. Note end of concrete footing where wall changes from granite/puddingstone to remnants of pre-existing puddingstone wall (with rubble foundation).
10. Transition from rebuilt combo granite/puddingstone wall on Bussey Street to remnant puddingstone rubble wall on Walter Street (to be repaired in place—no disturbance to rubble footing).
11. New Bussey Street wall across demolished north entrance; red McCabe machine is sitting on roadbed of old north gate; note remnant chain link fence where edge of sidewalk used to be.
12. sim to #11
14. Temp. pedestrian ramp in place at end of Bussey Street stone wall (across old north gate)
15. Excavating to subgrade at new north gate.
16. Excavating to subgrade at new north gate.
17. Excavating for sidewalk near Bussey/Walter St. intersection
18. Concrete catch basin structures (for stormwater), waiting for installation in Walter Street. Granite curb stockpile.
19. Bussey Street, excavating for new asphalt sidewalk
20. Installing & compacting road base material (dense graded crushed stone) from north gate to Hemlock Hill road.
21. Staking grades at north gate
22. Loose subgrade of old roadbed; note how old AA road was built on puddingstone rubble foundation. Red machine is screening rocks from fill.
23. Remnants of demolished roadbed and stone wall next to oak, from old north gate
24. Demolished roadbed of old north gate; temp pedestrian ramp into AA beyond yew.
25. Spreading road base material; compacting to proper subgrade; reset rim of sewer manhole to new higher elevation.
26. Stockpiled vertical granite curb at Walter Street gate, for installation in Walter Street.
27. Walter Street gate used for stockpile area; existing road conditions before demolition/construction.

BSG construction 3

LTB
1. John Brennan of Lee Kennedy Co., digging in Bussey St sidewalk subbase to check material/depth
2. checking whether sidewalk subbase depth & material meets specifications & drawings
3. checking whether sidewalk subbase depth & material meets specifications & drawings
4. checking whether sidewalk subbase depth & material meets specifications & drawings
5. pavement sawcut & removed from Bussey Street north gateway, note large oak in ctr to remain
6. Bussey Street north gateway in progress; concrete cores for new gate piers in place
7. laying curb in Bussey Street at new north gateway; new vertical meets ext’g sloped cobble curb
8. preparation for new Bussey Street sidewalk
9. Old Hemlock Hill roadbed removed near north gate; sewer manhole to be reset
10. contractor’s temporary rubble stockpile in dump; for disposal
11. Bussey Street during construction of new north gate
12. Bussey Street sidewalk, north side
13. Roadbed of old north gate following asphalt removal, new wall at Bussey Street to close off entry
14. Mock-up concrete panel for sidewalks around new gates
15. Newly paved Bussey Street sidewalk & rebuilt wall. Unfinished wall end in foreground is waiting for resolution of Walter Street layout and wall radius
16. View into site from Hemlock Hill road. Note large oak in center; new north gate design moves roadway from one side to the other
17. Peters Hill roadway following asphalt removal
18. View from Peters Hill to new north gateway
19. Demolition of Peters Hill sidewalk in preparation for new curb/sidewalk layout
20. Peters Hill roadway following asphalt removal
21. Base coat asphalt paving of Hemlock Hill road to new north gate @ Bussey Street
22. View down Bussey Street: north gate on right, Peters Hill on left. Rebuilt stone wall on right side.
23. Looking down Peters Hill road. Rebar and yellow tape are locations of new gate piers.
24. Removing existing road base material on Peters Hill in preparation for new roadbed & grades
25. Rebar formwork for concrete core of new granite gate post, Peters Hill.
26. Rebar formwork for concrete core of opposite granite gate post, Peters Hill.
27. North gateway awaiting granite capstones at piers and more concrete sidewalk poured
28. Stockpiles, looking towards Walter St. gate
1. surveying Peters Hill roadway to set new grade, following asphalt removal of old road
2. Bob from McCabe (subcontractors) surveying Peters Hill roadway to set new grade.
3. surveying Peters Hill roadway to set new grade
4. Peters Hill, edge of new roadway staked out
5. Peters Hill: setting new cobble curb at road’s edge
6. Peters Hill: setting new cobble curb at road’s edge
7. Peters Hill: setting new cobble curb at road’s edge
8. concrete cores for new granite-faced gate posts, Peters Hill
9. setting granite curb, Bussey Street at Peters Hill
10. sub-base material for Bussey Street sidewalk
11. setting curb at Bussey Street; concrete core of new gate pier
12. setting curb, Peters Hill/Bussey Street
13. grading Peters Hill roadway; granite gate pier before installation of capstone
14. setting subgrade of Peters Hill road. New cobble curb
15. base material for Peters Hill road
16. granite-faced gate pier; waiting for solid granite capstone
17. vibrating compactor; setting sidewalk subgrade at Bussey Street
18. granite-faced gate pier; face stones attached to concrete core by steel anchor clips
19. view towards Peters Hill across Bussey Street
20. view towards Walter Street gate
21. North side (opposite Peters Hill) Bussey Street gateway in progress
5. Peters Hill gate post stumps—gate burned off and removed for refabrication by DeAngelis Iron.
6. Peters Hill gate after being burned off its posts for refabrication—pieces not assembled right.
7. Peters Hill with base coat paving installed. Right gate leaf has been removed for refabrication.
9. View towards Walter St gate. Cobble swale uncovered, stonedust path being installed.
11. Existing cobble swale excavated from under asphalt road to gate. New stonedust path.
12. Installation of asphalt sidewalks at Walter Street gate.
13. Asphalt sidewalks and granite curb installation at Walter St. gate.
14. Sidewalk paving at Walter Street gate.
15. Sidewalk paving at Walter Street gate.
16. Sidewalk paving at Walter Street gate.
17. Bollard installation at Walter Street gate.
18. New stonedust path at Walter Street gate.
28. CRJA landscape architect Kristine Kenney and LKCo site super Paul McDonald measuring for vertical granite curb, following 9/23 storm damage to stonedust path.
29. Measuring for vertical granite curb.
30. Erosion damage to stonedust path from street runoff, 9/23 storm.
31. Erosion damage to stonedust path from street runoff, 9/23 storm.
32. Kristine Kenney reviewing recent work.
33. Hydroseeding near north Bussey St. gate.
34. Limit of work at junction with Hemlock Hill Road. Recent hydroseeding.
35. Bussey Street north gate & view to Walter St. gate, following hydroseeding.
36. Bussey Street gates, north side and Peters Hill, after top coat asphalt paving and recent hydroseeding of lawn areas.
37. Peters Hill gate from opposite (north) side Bussey Street.
